ROBERT MCCARTER

Tampa FL | (813) 838-6140 | robtmccarter@outlook.com

Summary

Programming is very engaging to me. I'm changing careers to do it full time because of how much I enjoy it. When I have a breakthrough solving a logical problem and see the solution work, I get excited! Originally I learned Python in 2021, but I switched to front-end client-side development throughout 2022. It is my desire to be a front-end web developer and part of a software development team building user interfaces that serve a need.

Skills

- **HTML, CSS, JavaScript, APIs, JSON**

I build responsive websites using JavaScript for data manipulation, DOM manipulation, and RESTful API consumption.

- **JSX, React, Redux**

I'm currently developing and deploying in React.
I build class and functional components with JSX using create-react-app.
I'm familiar with the Redux state management library.

- **Bash, Git, GitHub, NPM**

I use Bash shell on Windows for my terminal, file system, and Git version control.
I actively stage, commit with comment, and push files to a GitHub remote.
I use Node.js modules and NPM to manage packages.

- **Mocha, Jest**

I use Mocha or Jest for Node JS Unit testing.
